

Work From Home Policy

ACME Corporation | Work From Home and Hybrid Work Policy - HR-POL-007 - Effective 01 March 2025

1. Purpose

ACME Corporation operates a hybrid working model that balances the flexibility employees value with the in-person collaboration teams need.

This policy sets out how often employees may work remotely, how remote days are requested, and the standards expected while working from home.

2. Hybrid Work Entitlement

Employees may work from home up to 2 days per week. The remaining three days are worked from the assigned ACME office.

Teams designate Tuesday and Thursday as anchor days on which the whole team is expected in the office. Work from home days are therefore normally taken on Monday, Wednesday or Friday.

Remote days do not carry forward. An unused work from home day in one week cannot be added to the following week.

Employees in their first 60 days of employment work from the office five days a week to support onboarding, unless the HR Business Partner approves an exception.

3. Requesting Remote Work

Regular work from home days are recorded in the ACME HR portal under My Work Location by Friday of the preceding week.

Ad-hoc remote work for reasons such as a home repair or a medical appointment requires informing the reporting manager by message before the start of the working day.

Requests to work remotely for more than 10 consecutive working days are treated as extended remote work and need approval from the department head.

4. Eligibility and Exceptions

Roles that require physical presence, including facilities, reception, lab operations and hardware support, are not eligible for the standard hybrid entitlement.

Employees with a documented medical condition or accessibility requirement may request a permanent remote arrangement through the HR Business Partner.

Employees on a performance improvement plan work from the office full time for the duration of the plan.

5. Expectations While Working Remotely

Employees must be reachable on the approved collaboration tools during core hours of 10:00 AM to 5:00 PM.

A stable internet connection of at least 25 Mbps is expected. ACME provides a monthly internet allowance of INR 1,000 to employees on the hybrid model.

Company data may only be accessed from an ACME-issued device connected to the corporate VPN. Working from public or unsecured networks without the VPN is prohibited.

Employees are responsible for a safe and ergonomic home workspace. ACME offers a one-time home office setup reimbursement of INR 15,000.

6. Working From a Different City

Employees who wish to work from a city other than their base location for more than 15 working days must obtain written approval from their department head and notify HR, as this can have payroll and tax implications.

Working from outside the country requires prior approval from the Head of Human Resources and the Finance team, and is normally limited to 30 days per leave year.
